

# TITEC<sup>®</sup>

SENSORIK NACH MAß

**SENSORS FROM THE EXPERTS  
FOR CUSTOMISED APPLICATIONS AND MAXIMUM EFFICIENCY**

## Tradition meets innovation

Starting out as a garage company in Donaueschingen in 1992, **TITEC** is a **global player** in **temperature measurement technology** now.

From direct sales of temperature and gas analysis probes, we have developed our family business into an **innovative measurement technology expert**. Our products are the fusion of Black Forest roots and **high-end technology**.

We rely on internal workflows to ensure **customised sensor solutions** of the highest quality. Self-financed, with **200 professionals on 8,000 m<sup>2</sup>** and **up-to-date electronics assembly** and **X-ray inspection**, **TITEC** delivers first-class products at optimal prices.

**Over 30 years  
of experience in  
sensor &  
measurement  
technology**

## The TiTEC deal

- Diverse portfolio for building technology and industry: **temperature, humidity, pressure, CO<sub>2</sub>, air quality, movement, light, flow** and other measured variables
- Constant **product innovations** and **further developments** such as sensors for dew point applications, cable harnesses, flow monitors or head transmitters
- **Customised production** thanks to a high level of **vertical integration** in our various production areas: Industrial production for passive sensors such as cable temperature sensors, screw-in sensors with head, contact sensors or sheathed thermocouples; electronics production for active devices such as transmitters, outdoor temperature sensors, pressure transmitters or dew point monitors
- **Personal customer service** with fixed contact persons in the internal sales department as well as tech service from our field service on site at the customer's premises
- **In-house development** and production with local flair
- **Safety stock** for blanket orders
- **Cost efficiency** through smart production measures

**Individual solutions thanks to high Manufacturing depth**

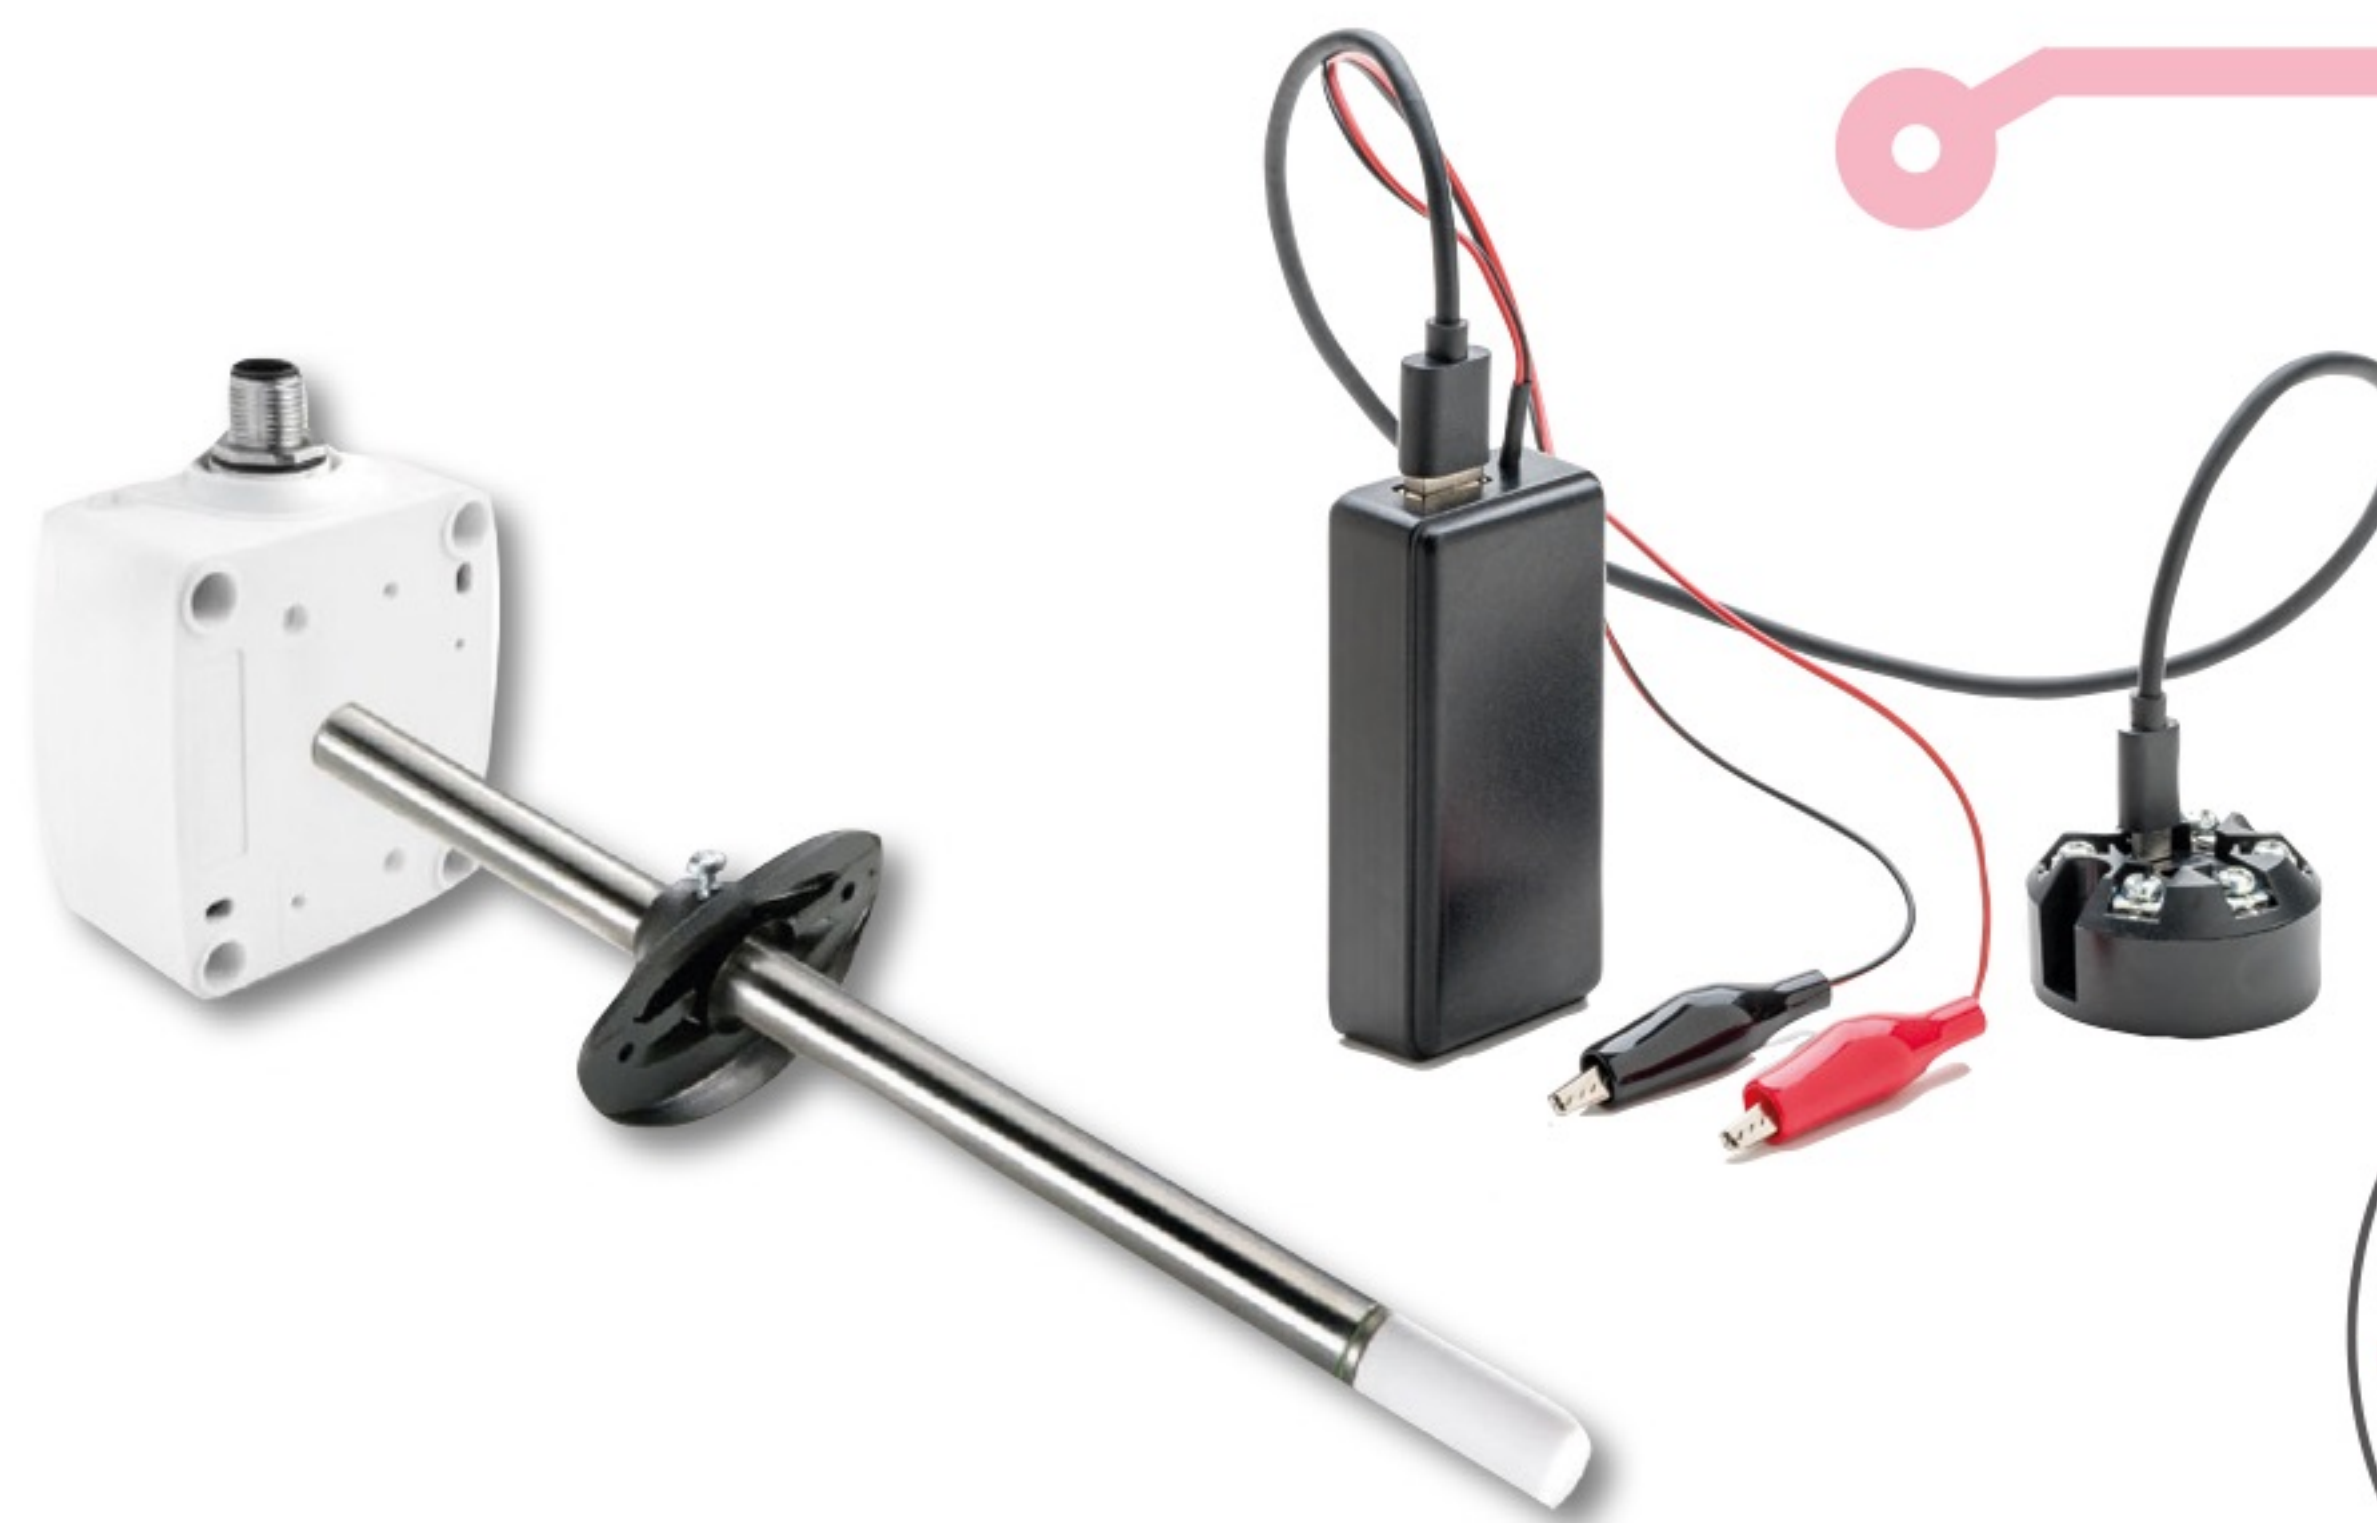

## Top quality made in Germany

Our commitment to excellence: **TiTEC quality** has been a **benchmark** in the industry for over three decades.

- Premium materials: stainless steels, Inconel, Hastelloy, aluminium, brass, plastics
- Ongoing check-ups at various levels
- ISO 9001 certificate for top-level quality
- 100% local functional and final inspections
- Continuous optimisation and automation
- Service mindset with honest service and support

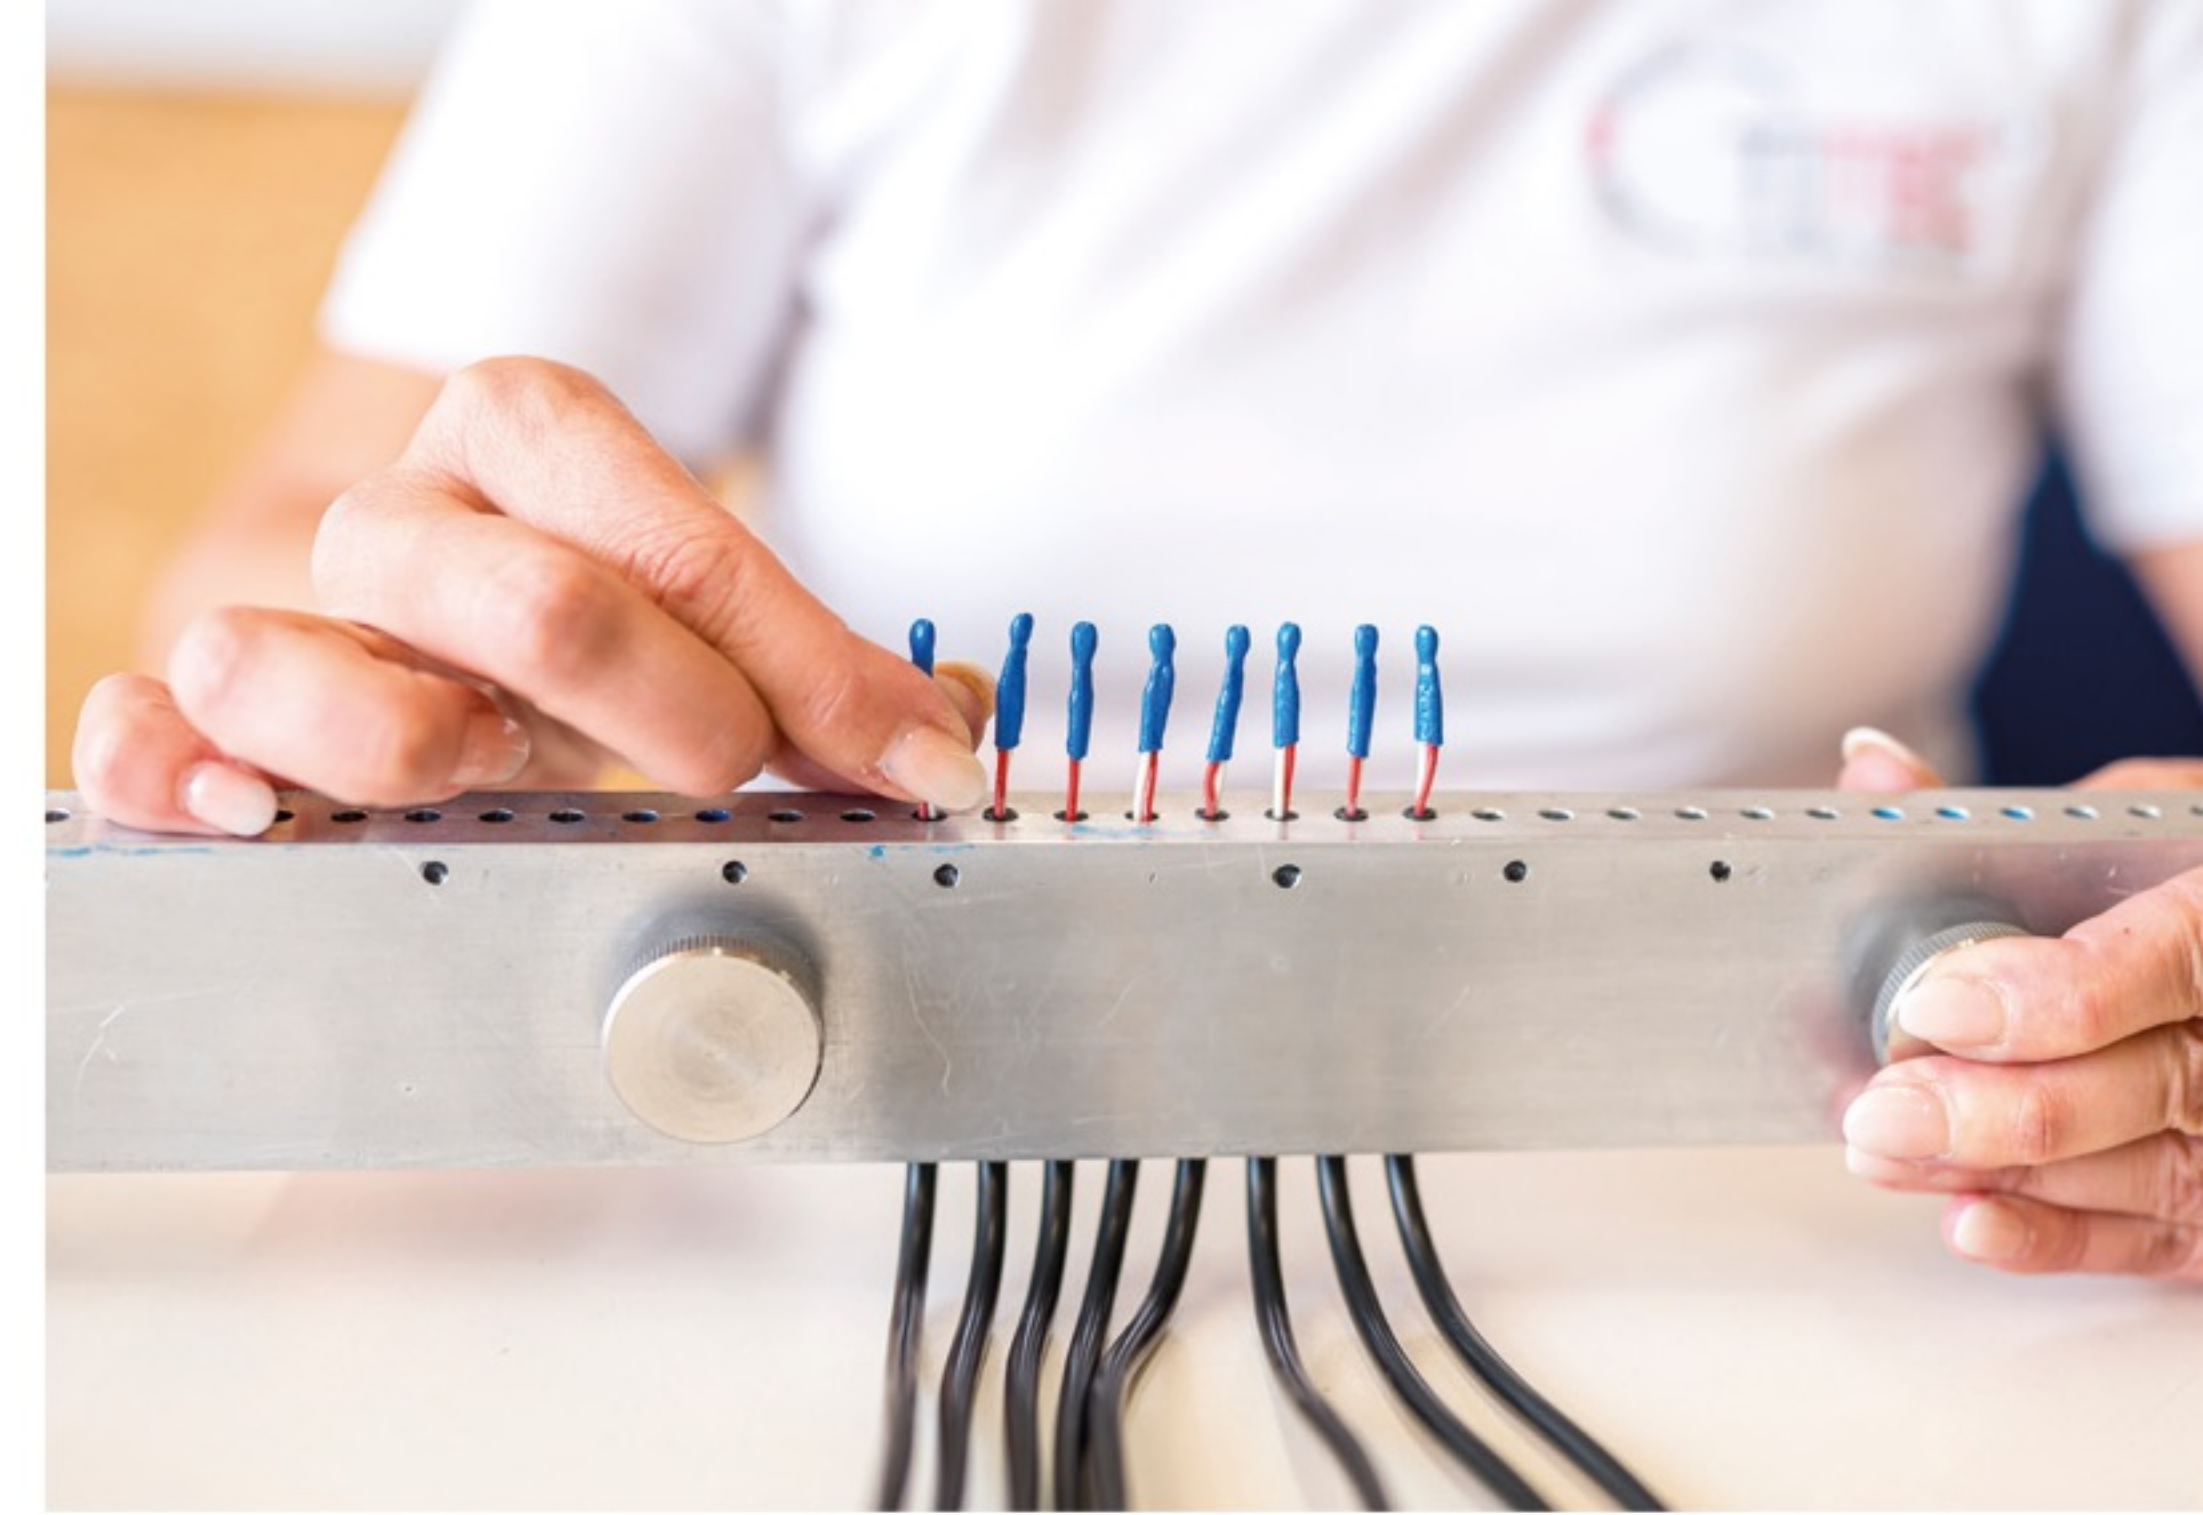

## Always up-to-date with TiTEC

**TiTEC** is **future-orientated** and always at the cutting edge. Our ongoing feature **strategy** initiatives for growth and innovation include:

- New locations for production and storage
- Investment in state-of-the-art equipment, systems and facilities
- Ongoing automation for efficient budgeting
- Sustainability measures (95 % energy from own PV system)

**Temperature - Humidity - Pressure - Co<sub>2</sub> - Air quality - Movement - Light measurement - Flow measurement**
